Jakarta, Indonesia | [\(+62\) 85817516675](tel:+6285817516675) | sulthandrwrk@gmail.com | [linkedin.com/in/sulthandhafirrafief/](https://www.linkedin.com/in/sulthandhafirrafief/)
[My Portfolio](#)

PROFILE

Information Technology student at President University with strong focus on Software Development and Artificial Intelligence. Experienced in building modern web applications using technologies like React and TypeScript, and developing AI powered solutions through hands on projects. Strong problem solving mindset with hands on engineering experience and proven leadership through academic and organizational projects.

EDUCATION

President University | *Bachelor of Information Technology* Aug 2023 - Present
Expected Graduation: 2026 | Current Semester: 7

- Cumulative GPA: 3.90/4.00
- Jababeka Scholarship (2nd Rank)

WORK EXPERIENCE

Full Stack & AI Engineer - Internship | **PT Nose Herbalindo** Sep 2025 – Dec 2025

- Developed and integrated production ready frontend components with backend services for IFC News platforms.
- Built automated data pipelines including news scraping, AI based summarization, and crypto alert systems with optimized performance and token efficiency.
- Managed deployment and cloud environments using Cloudflare and Railway to ensure stable and scalable system delivery.
- Refactored UI and database architecture, improving system consistency, maintainability, and data reliability.
- Contributed to the development of Genius AI, an AI powered educational assistant for children, by implementing and optimizing MQTT based communication systems.

PROJECTS

IFC News (AI Powered Financial News Platform) [Link](#)

- Built an AI powered financial news web application using React TypeScript and Tailwind for real time information delivery.
- Implemented Python based automation pipelines to generate and distribute real time market insights.

Plastic Bottle Defect Detection (Computer Vision - YOLOv5) [Link](#)

- Designed and implemented a real time defect detection system using YOLOv5 on industrial grade image data.
- Applied advanced image preprocessing and augmentation with Albumentations to improve model robustness.
- Achieved high detection accuracy and real time inference suitable for automated production environments.

Vehicle Classification (Deep Learning - CNN) [Link](#)

- Developed an image classification model to recognize multiple vehicle categories using a custom CNN architecture.
- Performed dataset preprocessing, augmentation, training, and evaluation using accuracy metrics and confusion matrix.
- Deployed the model to Hugging Face Spaces with Gradio for interactive real-time inference.

Sign to Speech AI (Computer Vision & Speech Synthesis) [Link](#)

- Built a real time sign detection system using YOLOv11n and OpenCV with voice output generation via gTTS.
- Implemented a local Python based GUI as a functional prototype for testing and validation.

ORGANIZATIONAL EXPERIENCES

Head of Division, Student Activity | **BEM President University** Oct 2024 - Oct 2025

- Led and coordinated a division responsible for planning and executing student activities and major campus events.
- Supervised multiple project teams, ensuring timelines, task distribution, and event objectives were met.
- Acted as project supervisor for several BEM events, maintaining quality control and workflow efficiency.
- Developed leadership, communication, and problem solving skills through cross division collaboration.

Project Manager | **Student Awarding Night 2024** Nov 2024

- Managed end to end event execution including planning, budgeting, team coordination, and final delivery for an event with 200+ participants.
- Led a team from different divisions to ensure smooth technical and operational execution of the event.
- Successfully delivered the event on schedule with high participant satisfaction and strong audience engagement.

Vice Project Manager | **Grant of Hopes 2024** Apr 2024

- Assisted in project planning and operational management for a social initiative involving 130+ participants.
- Coordinated with internal teams to ensure task alignment and event readiness.
- Supported risk handling and onsite problem solving during event execution.

SKILLS

- Hard Skills:** Coldfusion, SQL, Python, React, TypeScript, JavaScript, HTML, CSS, Tailwind CSS, Java, API Integration, Data Preprocessing, Model Evaluation, Deep Learning, Computer Vision
- Tools:** VS Code, GitLab, GitHub, Figma, Postman, MongoDB, Railway, Cloudflare, Google Colab
- Soft Skills:** Leadership, Attention to Detail, Problem Solving, Teamwork, Time Management
- Languages:** Indonesian, English
